

DISSECTING TABLE

GRUME-A

Product Name:

Ventilation type dissection table

Applications:

Mortuary; Anatomy, forensic examinations, medical colleges and hospitals, etc.

Product size:

L2100*W600*H850mm; Special sizes can be customized.

Package:

Packed in plywood case; packing size: 2130*810*1360MM

Specification:

- Material: Full stainless steel 304.
- Ventilation type dissection table, It is a ventilation animal dissection table, designed for sinking, is designed to provide a comfortable and sanitary platform for autopsy and anatomy, surgery and perfusion.
- The function of this dissection table is to pull down the air, odor, steam and aerosol, control chemicals such as formaldehyde, ethanol and xylene, can keep below the allowable exposure limit of OSHA, thus providing a healthier A safer working environment.
- Standard design: There are 4 removable punching tops on the upper level for easy cleaning, with sink and manual faucets, or sensor faucets. The lower deck is designed for overall sinking and the drain is more thorough.
- Dissection table specifications: Length 2100mm, width 600mm, height 850mm The whole is welded with high quality 304 stainless steel. All exposed welds have been seamlessly polished. This anatomical table top is recessed by 1 cm to prevent liquid from flowing out of the table.
- The two-pedestal design provides knees and legs under the table, allowing the user to choose the height of the stool seat or stand.
- Ventilation design: It is possible to vent upwards through the ceiling connection, or through the wall at the back, or to draw down the air to connect the outdoor exhaust fan through the ground. The ventilation duct may be circular or square, and the manual draft adjustment in the ventilation duct allows the air volume to be adjusted freely.
- Sewage design: The entire surface of the lower deck is inclined, and one end is connected to the sewage outlet.
- Cleaning design: High-pressure water gun cleaning.
- Power supply design: With power socket and leakage protector.

GRUME-B

Product Name:

Ventilation type dissecting table

Applications:

Mortuary; Anatomy, forensic examinations, medical colleges and hospitals, etc.

Product size:

L1500*W600*H850mm; Special sizes can be customized.

Package:

Packed in plywood case; packing size:1530*810*1360MM

Specification:

- Material: Full stainless steel 304.
- Ventilation type animal dissection table RD-HZ-1001. This machine has a sinking ventilation design. This design is to provide a comfortable and sanitary platform for autopsy and dissection, surgery, and perfusion.
- The function of this dissecting table is to pull down the air, odor, steam and aerosol, control chemicals such as formaldehyde, ethanol and xylene, can keep below the allowable exposure limit of OSHA, thus providing a healthier A safer working environment.
- Standard design: There are 4 removable punching tops on the upper level for easy cleaning, with sink and manual faucets, or sensor faucets. The lower deck is designed for overall sinking and the drain is more thorough.
- Anatomical bench size: 1500mm long, 600mm wide and 850mm high. The whole is welded with high quality 304 stainless steel. All exposed welds have been seamlessly ground. This anatomical table top is recessed by 1 cm to prevent liquid from flowing out of the table.
- The two-pedestal design provides knees and legs under the table, allowing the user to choose the height of the stool seat or stand.
- Ventilation design: It is possible to vent upwards through the ceiling connection, or through the wall at the back, or to draw down the air to connect the outdoor exhaust fan through the ground. The ventilation duct may be circular or square, and the manual draft adjustment in the ventilation duct allows the air volume to be adjusted freely.
- Ventilation design: It can be pumped upwards through the ceiling connection, it can also be connected at the back through the wall, or downdraft through the ground to connect the outdoor exhaust fan, the exhaust pipe can be round or square, and there is manual air volume adjustment in the exhaust pipe. Cutting can freely adjust the amount of air volume.
- Sewage design: The entire surface of the lower deck is inclined, and one end is connected to the sewage outlet.
- Cleaning design: High-pressure water gun cleaning.
- Power supply design: with power socket and leakage protector.

Matching:

1. Lampless
2. Recording pallets
3. emergency eye wash
4. Anti-pollution vacuum cutting
